- Systems Thinking
- Cybernetics
- SeaForge Notes
- SessionPeak
- PTI / Signal Experiments

Posting Note (v1)

Intent: This first glyph is an index, not a conclusion.

It functions as a bounded invitation into the thought substrate behind Decision Layer Labs.

Format rule: Read, not scroll.

Finite note. Printable feel. Quiet provenance.

Glyph logic: On xof10k, the paper symbol beside *Decision Layer Labs* serves as the inner-circle invite into the thinking beneath the build.

Update rule: Route future ideas back into these core notes rather than proliferating essays. Refine the canon; don't expand the clutter.

Margin line candidate

What good is ubiquitous energy with inefficient thinking?

(parked as candidate doctrine line / possible epigraph)

v1 posted as spine. Refine through use.
